**INTERNET FREEDOM**

**June 15, 2017**

I am in the medical business as a rural physician. I count on the internet for my work. I have worked outside of this country too.

Just like health care, it needs to remain totally free for personal and business matters unencumbered by money or politics or national interests. I have travelled extensively and it obviously keeps the world, developed or undeveloped, in touch. This is vitally important for world peace and earthly sustainability.

Please keep it free for all of us to use equally.

Thank you.

Larry Myers MD
